David Gerardo Mendieta Lira

Senior UX Researcher & Product Strategist | Regulated Financial Environments
Mexico City | davidgerardom@gmail.com | linkedin.com/in/david-g-mendieta Portfolio: https://davidgmendieta.vercel.app/ | Bilingual: Spanish (Native) · English (C1 Business Fluent)

PROFESSIONAL SUMMARY

Senior UX Researcher and Product Strategist with 15+ years of experience designing and validating digital products in highly regulated financial environments — including Microfinance Banking, Consumer Credit, B2B SaaS Fintech, and Government. Deep expertise ensuring products comply with banking regulations, KYC/AML guidelines, and data privacy requirements (LFPDPPP / CNBV framework). Proven track record partnering with Risk, Compliance, and Legal teams to obtain regulatory approvals for new product features while protecting the end-user experience. Bilingual (EN/ES, C1) and experienced leading cross-functional squads across regulated enterprise ecosystems.

REGULATORY & COMPLIANCE EXPERTISE

Core domains where I have operated with direct compliance accountability:

Banking & Financial Regulation (Mexico): CNBV (Comisión Nacional Bancaria y de Valores) compliance frameworks, Circular Única de Bancos (CUB), SOFOM regulatory requirements, Microfinance sector regulation.

KYC / AML / CFT: Designed and validated digital onboarding flows and identity verification journeys ensuring full KYC (Know Your Customer) compliance. Collaborated with AML/CFT teams to embed regulatory checkpoints without degrading user experience. Tested biometric capture, document validation, and facial recognition flows for regulatory sign-off.

Data Privacy & Security (LFPDPPP): Ensured UX flows for credit origination, digital onboarding, and customer data capture complied with Mexico's Federal Data Protection Law (LFPDPPP). Defined consent architecture and privacy notice integration points within product flows. Collaborated with Data Protection Officers (DPOs) to validate information collection minimization principles.

RBAC & Identity Management: Validated Role-Based Access Control (RBAC) implementations for internal banking tools — ensuring permission hierarchies, governance workflows, and audit trails met both security standards and operational usability requirements for 15,000+ internal users.

Offline Resilience & Data Integrity: Defined UX flows for offline-capable credit origination in low-connectivity field environments, ensuring secure local data handling, synchronization protocols, and audit log integrity compliant with internal security policies.

Regulated Stakeholder Alignment: Served as the UX/Research liaison in cross-functional review sessions with Risk, Legal, Compliance, and Internal Audit teams. Translated regulatory constraints into design requirements and presented user experience rationale to obtain feature approvals from compliance gatekeepers.

PROFESSIONAL EXPERIENCE

Head of Product & UX Research | Whisper BI *Jan 2025 — Present*

AI-powered B2B SaaS Business Intelligence platform operating in the financial data analytics space, serving regulated enterprise clients.

Regulatory context: Financial data governance · Enterprise data security · B2B SaaS compliance

- Designed data access and permission architecture for enterprise clients, ensuring tiered access controls and audit trails compliant with client-side data governance requirements.
- Defined consent and data usage frameworks for AI-generated financial insights, ensuring transparency standards aligned with enterprise legal and privacy requirements.

- Built customer lifecycle model for regulated corporate clients, including contractual compliance checkpoints during onboarding and feature activation.
- Established CX Dashboard correlating usage metrics with satisfaction scores to predict churn — with privacy-compliant data collection architecture at its core.
- Led end-to-end MVP delivery securing first paying B2B corporate clients within 3 months, including enterprises with internal compliance review processes.

Senior UX Research & Experience Strategy Lead | Gentera — Compartamos Banco *May 2021 — Jan 2025*

Compartamos Banco is the largest microfinance bank in Latin America (3M+ customers), operating under full CNBV supervision with strict KYC, AML/CFT, and data privacy obligations. Gentera is its holding group.

Regulatory context: CNBV · KYC/AML/CFT · LFPDPPP · SOFOM regulation · Internal Audit · Risk & Compliance

Regulatory Compliance & Risk Collaboration:

⚖️ Led the UX design and research validation of the end-to-end digital KYC / identity verification flow for new credit applicants — including biometric capture, INE/IFE document validation, and CURP verification — working directly with the AML/CFT compliance team to obtain regulatory sign-off before launch.

⚖️ Partnered with the Risk and Legal teams in a cross-functional 'War Room' to redefine credit scoring rules and data capture requirements for the digital origination channel, ensuring the new mobile-first flow met CNBV credit origination standards without introducing regulatory exposure.

⚖️ Defined the consent architecture and privacy notice placement within the digital onboarding journey, collaborating with the Data Protection Officer (DPO) to comply with LFPDPPP's informed consent and data minimization requirements.

⚖️ Validated RBAC (Role-Based Access Control) permission structures for the internal Administrator Portal — ensuring that access levels, approval hierarchies, and audit log visibility met Internal Audit and Information Security standards for 15,000+ employees across field and back-office roles.

⚖️ Designed offline-capable data capture flows for credit origination in low-connectivity rural environments, defining secure local storage protocols and encrypted sync mechanisms approved by Information Security and Compliance teams.

Research & Product Impact:

- Reduced loan origination cycle from 8 days to 2 hours (90% efficiency gain) by leading Service Design research that identified where regulatory steps created unnecessary friction — and redesigned the flow to be compliant without being burdensome.
- Created the organization's first Research Toolkit, scaling research capacity by 300% by training PMs and Designers to conduct unmoderated usability tests within compliance-approved testing protocols.
- Implemented Voice of Customer (VoC) program integrating NPS/CES/CSAT, with data collection and storage architecture reviewed and approved by the DPO team.
- Designed the CX Governance Framework standardizing interactions across Mobile App, Call Center, and Field Agents — with specific attention to regulatory language requirements in customer-facing communications.
- Led and mentored a multidisciplinary team of 40+ designers, researchers, and product owners across multiple regulated product lines.

Senior UX & Product Strategist (B2B SaaS) | OCC Mundial *May 2015 — May 2021*

Mexico's leading job board. B2B SaaS platform handling personal data of millions of job-seekers under LFPDPPP obligations, and transacting electronically with thousands of corporate clients (Personas Morales) under SAT/e-commerce regulatory requirements.

Regulatory context: LFPDPPP data privacy · Electronic billing compliance (CFDI/SAT) · B2B contractual compliance

- Led redesign of the corporate self-service billing model, working with Legal and Finance teams to ensure the new digital flow met SAT's electronic invoicing (CFDI) requirements and corporate contracting standards for Personas Morales.

- Conducted UX research to optimize the personal data consent flow for job-seeker profiles, collaborating with the DPO to ensure data collection points aligned with LFPDPPP's purpose limitation and consent requirements.
- Improved NPS by 15 points and drove a 12% increase in annual digital revenue through compliant, research-backed UX optimization of the B2B recruiter platform.
- Partnered with Legal to define data retention and deletion UX flows for candidate profiles — translating legal requirements into intuitive interface patterns.

Sr. UX Architect & Digital Strategy Consultant | Santander Mexico (via Leo Burnett) *Jun 2014 — May 2015*

Global banking group. Engagement focused on the national redesign of Santander Mexico's internal CRM — a mission-critical system operating under CNBV banking supervision, internal audit controls, and Grupo Santander's global security policies.

Regulatory context: CNBV banking regulation · Internal Audit · PCI-DSS adjacent · Grupo Santander global security standards

⚖ Redesigned the internal CRM workflow in close collaboration with Compliance and Internal Audit, ensuring all data capture, client history access, and cross-selling flows met CNBV's customer data handling requirements and Santander's global IT security policies.

⚖ Defined information architecture and navigation for sensitive client financial data — applying data minimization principles and role-appropriate information visibility to reduce unauthorized data exposure risk.

- New interface design reduced client onboarding time by 15% and facilitated compliant cross-selling flows, contributing to an 8% increase in sales in that category.
- Developed tone-of-voice and communication guidelines for internal applications, ensuring regulatory disclosures were clearly communicated to banking staff without creating operational friction.

Web Project & UX Design Lead | INFOTEC — FOVISSSTE *Jan 2006 — Nov 2013*

FOVISSSTE is Mexico's federal housing credit fund for government employees — a public financial institution operating under SHCP oversight, Ley de Transparencia, and federal accessibility mandates.

Regulatory context: SHCP oversight · Ley Federal de Transparencia (LFTAIPG) · WCAG accessibility compliance · Federal government digital standards

⚖ Designed institutional portals compliant with federal government digital standards, WCAG web accessibility requirements (mandatory for federal institutions), and the Ley Federal de Transparencia — ensuring public financial information was accurately and accessibly presented.

⚖ Implemented WCAG 2.0 accessibility standards across all digital touchpoints — a legal compliance requirement for Mexican federal government institutions — achieving recognition from the Presidency of the Republic (2011-2012) for improved citizen information access.

REGULATORY & COMPLIANCE COMPETENCY SUMMARY

Financial Regulation: CNBV, Circular Única de Bancos (CUB), SOFOM, Microfinance sector regulation, SHCP oversight frameworks.

KYC / AML / CFT: Digital identity verification UX, biometric flow design, document validation, AML/CFT checkpoint integration in digital onboarding.

Data Privacy: LFPDPPP (Mexico), consent architecture design, data minimization principles, DPO collaboration, privacy notice UX integration.

Identity & Access: RBAC design and validation, permission hierarchy UX, audit trail visibility, governance workflow design for banking-grade security requirements.

Cross-Functional Compliance Alignment: Bridging UX/Research with Risk, Legal, Compliance, Internal Audit, and DPO teams to translate regulatory constraints into user-centered design requirements and obtain feature approvals.

Accessibility Compliance: WCAG 2.0/2.1 implementation (mandatory government compliance), W3C standards, accessible financial product interfaces.

RESEARCH & PRODUCT TOOLS

Research: Maze · Useberry · Dovetail · Qualtrics · Hotjar · Google Analytics | **Design:** Figma · FigJam · Miro · Adobe CC | **PM:** JIRA · Confluence · Asana · Tableau · Power BI

EDUCATION & CERTIFICATIONS

Master's in IT Management (in progress) Universidad del Valle de México (UVM)
Bachelor's in Graphic Design, Web & Multimedia Universidad del Valle de México (UVM)

Professional Development: Leadership & Management — ICAMI (2023) · Measuring UX — Sol Metz (2021) · UX Week San Francisco (2018) · Lean UX — Usaria (2018) · User Research Methods — Usaria (2017) · Digital Product Design — ITAM (2017)
